To Whom It May Concern:

Every year the Directors of *Prime Time Youth Activity Center* seeks out facilities such as yours for field trips that can offer safe, age-appropriate summer time fun and quality learning experiences to our children. This year, we visited you and, as expected were extremely satisfied that our children enjoyed themselves, expanded their knowledge and had taken part in activities they would remember for a long, long time to come.

We take pride in both the summer we plan for the children and the behavior of the children while on these field trips. We staff our trips with ample staff/child ratios, usually 1 staff to every 5 children and have a structured and enforced behavior plan. This will ensure that all the children will have fun, learn and be safe and that the host will be pleased with our group visiting and welcome us back again. I am pleased to say that **was** the case when we visited you as your staff commented several times on the behavior of our children being "*a wonderful group of children.*" Likewise we had many favorable comments from the children as well as our staff and parents when the children went home and could not stop talking about all they did and learned which tells me we made a good choice when we chose your establishment.

I would especially like to thank you for taking time to allow our children the opportunity to learn how to make air brushed T-Shirts. The T-shirts were a great hit with our children. They enjoyed wearing them for a group photo shoot the following week. You did a wonderful job in creating the children's names. Your talent is commended!

We look forward to future field trips to T& T Graphics. I have enclosed a few pictures I hope you will share with your staff.

Sincerely yours,

Brenda Tyrrell  
Director
